*Memphis Glove's leather manufacturing incorporates craftsmanship and expertise from domestic and overseas operations dating back from 1933. Today's glove production is still one of the most demanding industries of highly skilled labor. We take pride in our quality control by endeavoring to set the highest standards within our industry.*

Side split leather comes from the rib area of the animal. This part of the leather is the most durable and provides the greatest protection because of its greater density of fibers.

## Types of Leather

## Industry Applications

Heavy duty and rugged requirements such as assembly, cable, construction, farming, foundry, jack hammer operations, iron & steel work, lumber and millwright operations, mining, rebar, rope handling, pipefitting, and stamping.
