Get a Grip

Memphis Glove's new "Red Series" combines the comfort of cotton with the rugged wear and protection of nitrile coating. The nitrile coating gives all styles extended wear and breathability, and all are washable. General purpose, tactile sensitivity and heavy-duty protection are available from these new styles.

Red Series

CE The Red Brick demonstrates from European Test Results its ability to handle objects at 482° F for 18 seconds and at 662° F for 14 seconds. This is above normal performance for standard 1-ply and 2-ply hotmill gloves.

 Sizes: S, M, L, XL

INDUSTRIAL APPLICATIONS

Heavy-duty working man's protection for heat and/or rough applications. Excellent option to traditional "Hot Mill" style. Provides extra grip, wear and thermal protection.

This general purpose style affords light-to-medium duty protection with extra grip and longer wear.

Tactile sensitivity and greater dexterity for applications where resistance, abrasion, cut and puncture protection are needed.
