# Quality of Life Award Recipient

**Safety is a Value -**  
MCR Safety is proud to honor John Burnham as our most recent "Quality of Life"

John Burnham

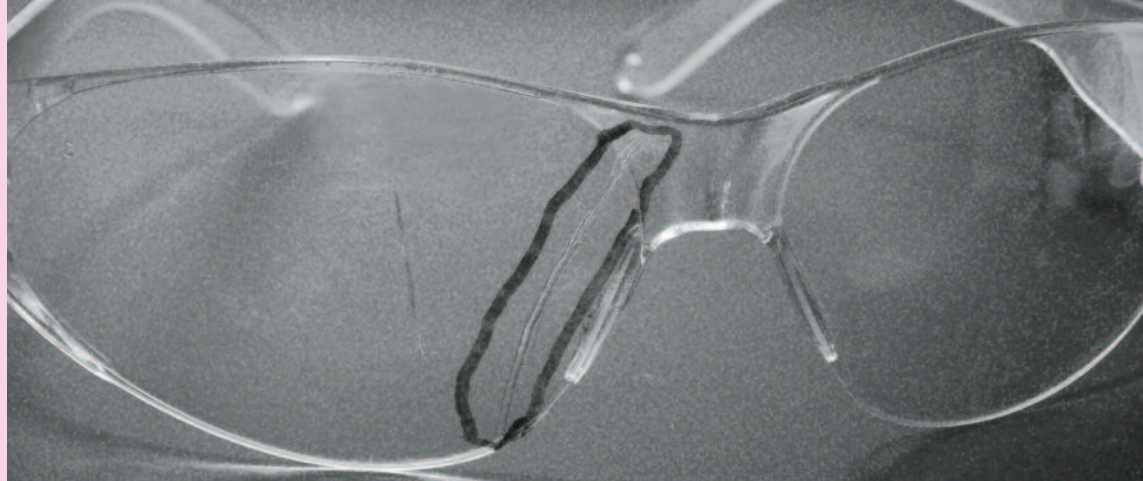

recipient. Mr. Burnham was recently involved in an accident that resulted in him being struck in the face with a chainsaw blade. Fortunately, he was wearing our Value Series Checklite protective eyewear which saved his eyesight and helped minimize head injuries. Here's his story:

"On Saturday, June 6th 2009, I was getting ready to cut wood. I had my chainsaw warming up for about 30-45 seconds when I squeezed the throttle trigger to bring the idle down. The chain snapped and struck me in the face. Thank the Lord I didn't need stitches and I'm thankful I was wearing the CL110 glasses. As you can see from the pictures, I circled the point of

impact with black marker to show where the eyewear was struck. While I did receive abrasions on my face and had a slight concussion, I still have my eyesight and will be ok.

When I called earlier, I was just thanking all of you for a quality product you have here and I would recommend these glasses to anyone or any company." – John Burnham

We would like to recognize other "Quality of Life" candidates. If you have a story to share concerning accident prevention from any of our PPE offerings, send it to us at [bshirley@mcrcsafety.com](mailto:bshirley@mcrcsafety.com).

We proudly support and participate in these trade associations:
